Precautions in the Use of Microwave Ovens for Heating Food

INSPECTION FOR DAMAGE. A microwave oven should only be used if an inspection confirms all the following items:

1. The grille is not damaged or broken.
2. The door fits squarely and securely and opens and closes smoothly.
3. The door hinges are in good condition.
4. The door does not open more than a few millimetres without an audible operation of the safety switches.
5. The metal plates of the metal seal on the door are neither buckled nor deformed.
6. The door seals are neither covered with food nor have large burn marks.

PRECAUTIONS. Microwave radiation from microwave ovens can cause harmful effects if the following precautions are not taken:

1. Never tamper with or inactivate the interlocking devices on the door.
2. Never poke an object, particularly a metal object, through the grille or between the door and the oven while the oven is operating.
3. Never place saucepans, unopened cans or other heavy metal objects in the oven.
Do not let other metallic articles, e.g. fast food foil containers, touch the side of the oven.
4. Clean the oven cavity, the door and the seals with water and a mild detergent at regular intervals.
Never use any form of abrasive cleaner that may scratch or scour surfaces around the door.
5. Never use the oven without the trays provided by the manufacturer.
6. Never operate the oven without a load (i.e. an absorbing material such as food or water) in the oven cavity unless specifically allowed in the manufacturer's literature.
7. Never rest heavy objects such as food containers on the door while it is open for horizontally hinged doors.
8. Do not place sealed containers in the microwave oven.

NOTE: Babies bottles fitted with a screw cap or a teat are considered to be sealed containers.

Important Instructions

WARNING——To reduce the risk of burns, electric shock, fire, injury to persons or excessive microwave energy:

1. Read all instructions before using microwave oven.
2. Some products such as whole eggs and sealed containers - (for example, closed glass jars and **sealed baby bottles with teat**) - may explode and should not be heated in microwave oven. Refer to cookbook for more detail.
3. Use this microwave oven only for its intended use as described in this manual.
4. As with any appliance, close supervision is necessary when used by children.
5. Do not operate this microwave oven, if it is not working properly, or if it has been damaged or dropped.
6. To reduce the risk of fire in the oven cavity:
 - (a) Do not overcook food. Carefully attend microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
 - (b) Remove wire twist-ties from bags before placing bag in oven.
 - (c) If materials inside the oven should ignite, keep oven door closed, turn oven off at the wall switch, or shut off power at the fuse or circuit breaker panel.

Earthing Instructions

This microwave oven must be earthed. In the event of an electrical short circuit, earthing reduces the risk of electric shock by providing an escape wire for the electric current. This microwave oven is equipped with a cord having an earthing wire with an earthing plug. The plug must be plugged into an outlet that is properly installed and earthed.

WARNING—— Improper use of the earthing plug can result in a risk of electric shock.

WE CERTIFY THAT THIS MICROWAVE OVEN HAS BEEN INSPECTED AND COMPLIES WITH THE REQUIREMENTS OF REGULATION 3, SUBCLAUSE(2), OF THE MICROWAVE OVENS REGULATIONS 1982.
MATSUSHITA ELECTRIC INDUSTRIAL CO.,LTD.

(This statement applicable only to New Zealand.)

WARNING

- a) The appliance should be inspected for damage to the door seals and door seal areas. If these areas are damaged the appliance should not be operated until it has been repaired by a qualified service technician trained by the manufacturer.
- b) It is dangerous for anyone other than a qualified service technician trained by the manufacturer to service this appliance.
- c) If the supply cord of this appliance is damaged, it must be replaced by the special cord available only from the manufacturer.

General Use

1. In order to maintain high quality, do not operate the oven when empty. The microwave energy will reflect continuously throughout the oven if no food or water is present to absorb energy.
2. If a fire occurs in the oven, touch the STOP/RESET Pad and Leave Door Closed, or turn TIMER to zero and Leave Door Closed. Disconnect the power cord, or shut off power at the fuse or circuit breaker panel.
3. Do not dry clothes, newspapers or other materials in oven. They may catch on fire.
4. Do not use recycled paper products, as they may contain impurities which may cause sparks and/or fires when used.
5. Do not use newspapers or paper bags for cooking.
6. Do not hit or strike control panel. Damage to controls may occur.
7. POT HOLDERS may be needed as heat from food is transferred to the cooking container and from the container to the glass tray. The glass tray can be very hot after removing the cooking container from the oven.
8. Do not store flammable materials next to, on top of, or in the oven. It could be a fire hazard.
9. Do not cook food directly on glass tray unless indicated in recipes. (Food should be placed in a suitable cooking utensil.)
10. **Do NOT** use this oven to heat chemicals or other non-food products. **Do NOT** clean this oven with any product that is labelled as containing corrosive chemicals. **The heating of corrosive chemicals in this oven may cause microwave radiation leaks.**

Placement of Oven

1. The oven must be placed on a flat, stable surface. For correct operation, the oven must have sufficient air flow. **Allow 10 cm of space at back, 5 cm on both sides and on top of oven. Do not remove feet.**
 - a. Do not block air vents. If they are blocked during operation, the oven may overheat. If the oven overheats, a thermal safety device will turn the oven off. The oven will remain inoperable until it has cooled.
 - b. Do not place oven near a hot or damp surface such as a gas stove, electric range or sink etc.
 - c. Do not operate oven when room humidity is too high.
2. This oven was manufactured for household use only.
3. These ovens except for NN-5752 may be built into a wall cabinet, if desired. Trim kits may be purchased from a local Panasonic dealer. See page 20 for technical specifications.

Food

1. Do not use your oven for home canning or the heating of any closed jar. Pressure will build up and the jar may explode. In addition, the microwave oven cannot maintain the food at the correct canning temperature. Improperly canned food may spoil and be dangerous to consume.
2. Do not attempt to deep fat fry in your microwave oven.
3. Do not boil eggs in their shell. (unless otherwise stated in cookbook section.) Pressure will build up and the eggs will explode.
4. Potatoes, apples, egg yolks, whole squash and sausages are examples of foods with nonporous skins. This type of food must be pierced before cooking, to prevent bursting.
5. Stir liquids several times during heating to avoid eruption of the liquid from the container, e.g. water, milk or milk based fluids.
6. **DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.** To check the degree of cooking of roasts and poultry use a **MICROWAVE THERMOMETER**. Alternatively, a conventional meat thermometer may be used after the food is removed from the oven. If undercooked, return meat or poultry to the oven and cook for a few more minutes at the recommended power level. It is important to ensure that meat and poultry are thoroughly cooked. (See the cookbook section for further information.)
7. **COOKING TIMES** given in the **cookbook section** are **APPROXIMATE**. Factors that may affect cooking time are preferred degree of moisture content, starting temperature, altitude, volume, size, shape of food and utensils used. As you become familiar with the oven, you will be able to adjust for these factors.
8. It is better to **UNDERCOOK RATHER THAN OVERCOOK** foods. If food is undercooked, it can always be returned to the oven for further cooking. If food is overcooked, nothing can be done. Always start with minimum cooking times recommended.
9. Extreme care should be taken when cooking popcorn in a microwave oven. Cook for minimum time as recommended by manufacturer. Use the directions suitable for the wattage of your microwave oven. **NEVER** leave oven unattended when popping popcorn.

Circuits

Your microwave ovens should be operated on a separate 230~240 V 10 A circuits from other appliances. Failure to do this may cause the power board fuse to blow, and/or food to cook slower. Do not insert higher value fuse in the power board.

Glass Tray

1. Do not operate the oven without the Roller Ring and Glass Tray in place.
2. Only use the Glass Tray specifically designed for this oven. Do not substitute any other Glass Tray.
3. If Glass Tray is hot, allow to cool before cleaning or placing in water.
4. **Do not** cook directly on Glass Tray. Always place food in a microwave-safe dish, or on a rack set in a microwave-safe dish.
5. If food or utensils on Glass Tray touches oven walls, causing the tray to stop moving, the tray will automatically rotate in the opposite direction. This is normal.

(15) Stop/Reset Pad

Before cooking: One tap clears your instructions.
During cooking: One tap temporarily stops the cooking process. Another tap cancels all your instructions and time of day appears in display window.

(16) Start Pad

One tap allows oven to begin functioning. If door is opened or STOP/RESET Pad is tapped once during oven operation, START Pad must again be pressed to restart oven.

Beep Sound

When a pad is pressed correctly, a beep will be heard. If a pad is pressed and no beep is heard, the unit did not or cannot accept the instruction. The oven will beep twice between programmed stages. At the end of any complete program, the oven will beep 5 times.

1 Plug in

Plug into a properly grounded electrical outlet. "88:88" appears in display.

2 Press the Stop/Reset Pad

You may set the clock instead of pressing this pad. (see page 8)

3 Press the Door Release Button

Open the door and place the food on the glass tray in the oven. Then close the door.

4 Press the Micro Power Pad

e.g. HIGH Power — Press once (Continue pressing for other power levels —page 9)

5 Press the Time Pad

e.g. 1 minute 30 seconds

6 Press the Start Pad

* The step-by-step sequence is shown when the next operation step required is indicated by a blinking light. (, etc.)

You can use the oven without setting the clock.

1 Press the Clock Pad

► Colon will blink.

2 Press the Time Pads

Enter time of day by pressing appropriate Time Pads.

e.g. 11:25

10	1	10	1
Min	Min	Sec	Sec

once twice 5 times

► Time appears in display window; colon is blinking.

NOTE: Max time available is 12:59.

Clock is 12 hour only.

3 Press the Clock Pad

► Colon stops blinking; time of day is entered and locked into display.

NOTE: Oven will not operate while colon is still blinking.

NOTES:

1. To reset time of day, repeat step 1 through step 3.
2. The clock will keep the time of day as long as oven is plugged in and electricity is supplied.

To Reheat/Defrost/Cook by Micro Power and Time

1

Micro Power

Select Power Level

 — by pressing Micro power Pad

NOTE: If you require HIGH power, eliminate step 1. High power automatically appear when select step 2.

Press	Power Level	% Power
once	HIGH	100 %

Colon or time of day appears in display window.

Sensor Cook

One Touch Cooking allows you to cook most of your favourite foods without having to select cooking times and power levels. The oven does it all

1 Press the Food Category Pad

To select the lower food category in NN-7852/ NN-6852, press food Category Pad twice.

e.g.

Press twice for Lamb.

► Category number appears in the display window.

2 Press the More/Less Pad

if you wish to alter cooking results.

1 tap: MORE cooking

2 taps: LESS cooking (see below)

3 Press the Start Pad

► After the burst of steam is detected by the SENSOR, the remaining cooking time appears in the display and begins to count down.

More/Less Pad:

Preferences for food doneness vary with each individual. After having used One Touch Cooking (Auto Sensor Cook) a few times, you may decide you would prefer your food cooked to a different doneness. By using the More/Less Control, the Auto Sensor programs can be adjusted to cook food for a longer or shorter time. If you are satisfied with the result of cooking with the built-in Auto Sensor program, you don't need to use More/Less Pad.

1 tap : More cooking with indicator " + "

2 taps : Less cooking with indicator " - "

Sensor Reheat

1

A rectangular button with the text "Sensor Reheat" inside.

Press the Sensor Reheat Pad

2

A rectangular button with a diamond-shaped icon containing an upward-pointing arrow and the text "Start" below it.

Press the Start Pad

► After the burst of steam is detected by SENSOR, the remaining cooking time appears in the display and begins to count down.

NOTES ON ONE TOUCH COOKING:

1. The Auto Sensor system works by detecting a build-up of steam on the sensor. All foods cooked using the Auto sensor should be covered with a securely fitted lid or plastic wrap. Do not pierce holes in plastic wrap. As foods cook in a microwave oven, steam is produced. After the burst of steam escapes from under the food covering and is detected by the SENSOR, a two beep signal is heard and the oven automatically calculates the remaining cooking time, which counts down in the display window.
2. When a One Touch Cooking Category is selected, the oven door should not be opened for longer than one minute. Opening the door may cause inaccurate cooking results. The oven door may be opened to stir, turn or add foods when the cooking time begins to countdown in the display window.
3. The room air temperature surrounding the oven should not be above 35°C when using the One Touch Cooking feature.
4. Foods less than 125 grams should be cooked by micro power and time only, not by One Touch Cooking.
5. When the remaining cooking time is over 60 minutes, the time will appear as hours and minutes.
6. All foods for One Touch Cooking are taken from their normal storage place.
7. Before using the One Touch Cooking feature make sure the Glass Tray in the oven is dry to assure best One Touch Cooking results.
8. Stand time or a power level can be programmed after One Touch Cooking. (See page 9)

For best results on sensor reheat, follow these recommendations:

1. All foods must be previously cooked and must be at room temperature or refrigerator temperature.
2. Foods should always be covered loosely but completely with plastic wrap or casserole lid which does not seal. (Do not use any snap closing lids.)
3. Foods weighing less than 125 grams and more than 1 kg should be reheated by power and time only.
4. All foods should have a covered stand time of 3 to 5 minutes.

DO NOT

1. Reheat bread and pastry products. Use manual power and time.
2. Reheat raw or uncooked food.
3. Use reheat if oven cavity is warm.
4. Use reheat for beverages.
5. Use reheat for frozen foods.

This feature allows you to defrost meat, poultry and seafood by weight.

1 Press 1.0 kg/0.1 kg Pads

Set the weight of the food.
Weight must be programmed in kilograms and tenths of a kilogram.

e.g. 1.5 kg chicken

press once 5 times

2 Press the Start Pad

► Defrosting time appears in the display and begins to count down.

The oven will beep after one third and two thirds of the defrosting time has elapsed to signal that the food needs to be turned, re-arranged or defrosted portions removed.

NOTE:

1. Stand time or power level may be programmed after Auto Defrost. (See pages 9 and 13)
2. For further information on Auto Defrost, refer to page 26.

To Store Recipe Program

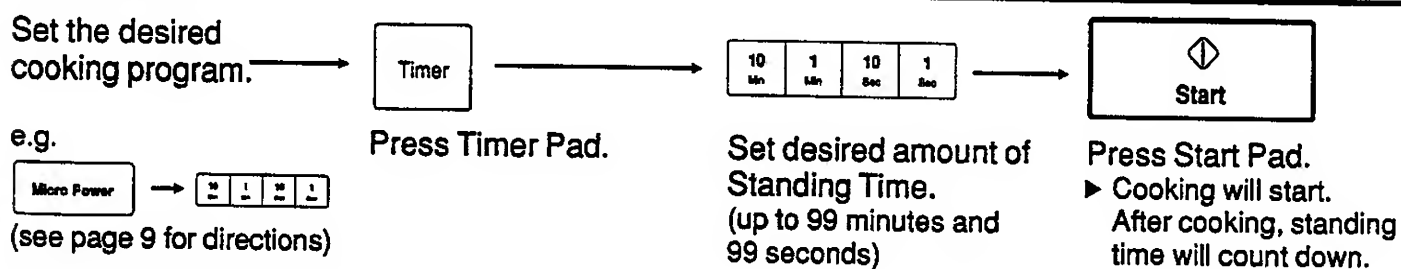

To Start Recipe Program

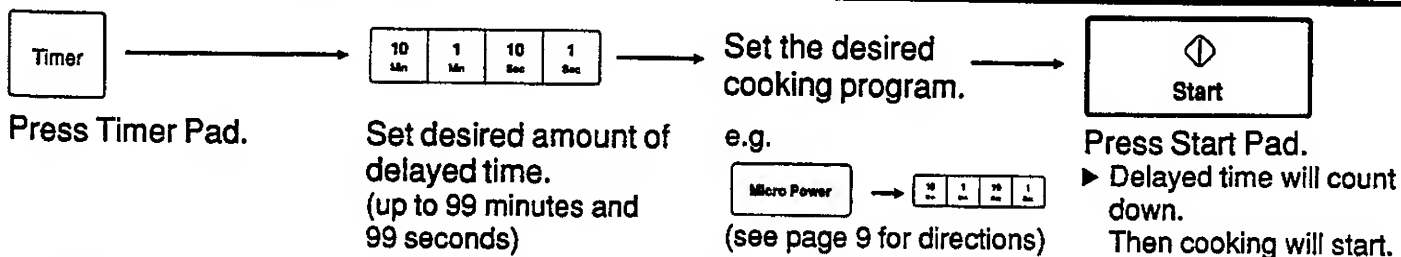

To Use as a Kitchen Timer

To Set Standing Time

To Set Delay Start

NOTES:

1. If oven door is opened during the Standing Time or Kitchen Timer, the time in display window will continue to count down.
2. Delay Start cannot be programmed before any Auto Control Function.
This is to prevent the starting temperature of the food from rising before defrosting or cooking begins.
A change in the starting temperature could cause inaccurate results.

This feature allows you to calculate the kilojoule of foods and the cumulative kilojoule amount of the day easily.

Controlling your kilojoule intake may contribute to a healthy life style; however, consult with your dietitian and physician for an appropriate dietary plan.

1 Press Food Pad

Set the number of the food category referring to the Food List on pages 16-18.

If you overpass, press  Adjustment (Count-Down) Pad.

2 Press Weight Selection Pad

Set the weight of the food (10-990 g).

If you overpass, press  Adjustment (Count-Down) Pad.

3 Press Food Pad again

► The number of kilojoule appears in the display window.

Note: The kilojoules indicated by the Kilojoule Calculator are a guide. The Kilojoule Calculator can not be 100% accurate due to the variances in foods available.

To Calculate the Cumulative Kilojoule

There are 2 procedures to calculate the cumulative kilojoule — step 1 to 2 and step 3 to 4.

1 For the 1st food:

 (and ) →  (and ) → 

Set the number of the food category. Set the weight of the food.

2 To store Kilojoule amount:

Press the Total Kilojoule Pad.

3 For the 2nd food:
(e.g. Frozen Convenience Food*)

 →

10 Min	1 Min	10 Sec	1 Sec
-----------	----------	-----------	----------

Press Food Pad. 4 times

Enter the kilojoule.
e.g. Frozen Pancake
400 kilojoule stated on package.

4 To store Kilojoule amount:

Press the Total Kilojoule Pad.

► The Cumulative Kilojoule will appear in the display.

* If the kilojoule value of a food is listed on the side of the package, simply enter the kilojoule value using the Time Pads.

NOTES:

1. For more foods, repeat step 1 and step 2 (or step 3 and step 4).
2. To recall the cumulative kilojoule:
Press Total Kilojoule Pad after entering the food eaten.
3. To cancel the cumulative kilojoule:
While the total kilojoule are displayed in the display window, press Total Kilojoule Pad again. While the number is blinking, press Stop/Reset Pad.
4. When the total kilojoule are over 99.9k kilojoule, "FULL" appears in the display window.
5. To store a daily total of Kilojoules consumed you may add all meal totals together and store using the Total Kilojoule Pad. Alternatively you may add foods that are "pre-packaged" and have a total Kilojoule amount.

Q: I accidentally ran my microwave oven without any food in it. Is it damaged?

Q: Why won't my oven turn on?

Q: The oven light turns on and the oven is programmed correctly, but it won't turn on.

Q: When I turn on my oven, there is noise coming from the glass tray.

Q: Can the oven be used with the glass tray or roller ring removed?

Q: My microwave oven causes interference with my TV. Is this normal?

Q: The oven won't accept my program. Why?

Q: Why does my oven light dim?

Q: Why does steam accumulate on the oven door?

Q: Sometimes warm air comes from the oven vents. Why?

Q: Can foil frozen food trays be placed in the oven?

Q: When can I open the door during One Touch Cooking?

Q: How are foods covered for One Touch Cooking?

A: We do not recommend operating the microwave oven without any food. However, running the oven empty for a short time will not damage the oven.

A: When the oven does not turn on, check the following:

1. Is the oven plugged in securely? Remove plug from outlet, wait 10 seconds and re-insert.
2. Check circuit breaker or fuse. Reset circuit breaker or replace fuse if it is tripped or blown.
3. If the circuit breaker or fuse is all right, plug another appliance into the outlet. If the other appliance works, there probably is a problem with the oven. If the other appliance does not work, there probably is a problem with the outlet.

If it seems there is a problem with the oven, contact an authorized Panasonic Service Centre.

A: Check to make sure the oven door is securely closed. If that was not the problem, contact the nearest authorized Panasonic Service Centre.

A: This noise occurs when the roller ring and oven bottom are dirty. Frequent cleaning of these parts should eliminate or reduce the noise.

A: No. Both the glass tray and roller ring must be positioned correctly in the oven before cooking.

A: Some radio and TV interference might occur when you cook with the microwave oven. This interference is similar to the interference caused by small appliances such as mixers, vacuums, blow dryers, etc. It does not indicate a problem with your oven.

A: The oven is designed not to accept an incorrect program. For example, the oven will not accept a fourth cooking stage.

A: When cooking with a power other than HIGH, the oven must cycle to obtain the lower power levels. The oven light dims and clicking noises can be heard when the oven cycles.

A: During cooking, steam is given off from the food. Most of the steam is removed from the oven by the air which circulates in the oven cavity. However, some steam will condense on cooler surfaces such as the oven door. This is normal.

A: The heat given off from the cooking food warms the air in the oven cavity. This warmed air is carried out of the oven by the air flow pattern in the oven. There are no microwaves in the air. The oven vents should never be blocked during cooking.

A: Frozen dinners or entrees may be heated in the foil tray, if the tray is less than 3 cm deep. Remove tray from box. Remove foil cover. Cover with plastic cover or plastic wrap. Place foil tray in centre of oven. Leave at least 2 cm space between foil tray and oven walls. Heat only 1 foil tray in the oven at a time.

A: The door may be opened when the remaining cooking time appears in the display window. Opening the door for longer than one minute when the cycle number is in the display window may cause inaccurate cooking results.

A: Foods, except for whole potatoes or whole squash, should always be cooked covered. Dishes with matching lids should be covered with the lid. Otherwise, cover the dish with plastic wrap. Lay the plastic wrap over the dish and smooth down around the sides.

Care of Your Microwave Oven

1. Turn the oven off and remove the power plug from the wall socket before cleaning.
2. Keep the inside of the oven clean. When food splatters or spilled liquids adhere to oven walls, wipe with a damp cloth. Mild detergent may be used if the oven gets very dirty. The use of harsh detergent or abrasives is not recommended.
3. The outside oven surfaces should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.
4. Do not allow the Control Panel to become wet. Clean with a soft, damp cloth. Do not use detergents, abrasives or spray-on cleaners on the Control Panel.
When cleaning the Control Panel, leave oven door open to prevent oven from accidentally turning on. After cleaning touch STOP/RESET Pad to clear display window, or make sure oven timer is set to off position.
5. If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity conditions and in no way indicates malfunction of the unit.
6. It is occasionally necessary to remove the glass tray for cleaning. Wash the tray in warm sudsy water or in a dishwasher.
7. The roller ring and oven cavity floor should be cleaned regularly to avoid excessive noise. Simply wipe the bottom surface of the oven with mild detergent, water or window cleaner and dry. The roller ring may be washed in mild sudsy water or dish washer. Cooking vapours collect during repeated use but in no way affect the bottom surface or roller ring wheels.
When removing the roller ring from cavity floor for cleaning, be sure to replace in the proper position.
8. When it becomes necessary to replace the oven light, please consult a dealer to have it replaced.

Microwaves and How They Work

Microwaves are a form of high frequency radio waves similar to those used by a radio, including AM, FM and CB. They are similar to a television where the radio waves are converted to a picture on the screen. However, microwaves are much shorter than radio waves; approximately twelve centimetres wave length.

Electricity is converted into microwave energy by the magnetron tube (which is the heart of the microwave oven).

From the magnetron tube, microwave energy is transmitted to the oven cavity through a small plastic covered piece. The microwaves are converted to heat in the food. The microwaves enter from the outside of the food and travel through the food losing half of their power every two to three centimetres. Continued cooking to the centre occurs by conduction.

Although pacemakers used to be affected by microwaves (as well as by other radio waves), they are now shielded and are not bothered by these interferences. This allows people with pacemakers to sit calmly by their radio or television and cook with microwave ovens.

When the microwaves come in contact with a substance, any one or a combination of three things may occur. They can be:

1. REFLECTED
2. TRANSMITTED
3. ABSORBED

Reflection

Metal substances REFLECT microwave energy and because there is no absorption there is no heating. This is why the oven interior is either stainless steel or epoxy-coated stainless steel. This ensures that the microwaves are kept inside the cavity and evenly distributed throughout the food with the help of the turntable.

Transmission

Such substances as paper, glass and plastic TRANSMIT microwave energy and do not become hot except from food. Because these substances do not reflect or absorb microwave energy, they are ideal materials for microwave cooking containers.

Absorption

Food contains moisture and will ABSORB microwave energy, which causes the moisture molecules within the food to vibrate at an incredible rate (2,450,000,000 times per second). Friction, created by vibration, produces heat energy which is conducted throughout the food.

Micro Power

The MICRO POWER pad gives you a selection of different power levels used for cooking foods at different speeds.

To select the correct power level for cooking different foods, refer to the chart below:

POWER LEVEL	POWER	EXAMPLE OF USE
HIGH	100 %	Boil Water, Cook Fresh Fruit, vegetables, rice and pasta. Preheat browning dish. Reheating soups, stews, casseroles.
DEFROST	30 %	Thawing Foods
MEDIUM-HIGH	70 %	Cook Poultry & Meat, Heating Milk, Cook cakes & desserts.
MEDIUM	55 %	Cook pot roasts, casseroles and meatloaves, melt chocolate. Cook eggs & Cheeses. Cook fish.
MEDIUM-LOW	30 %	Simmer soups, stews and casseroles (less tender cuts). Soften butter & cream cheese.
LOW	10 %	Keep cooked foods warm, simmer slowly.
TIMER	0 %	Reminder timer. Programme standing time after cooking. To delay the start of cooking.

Cookware and Utensil Guide

It is important to use the correct container when cooking in a Microwave Oven. The following will help you to make the right selection.

How to Test a Container for Safe Microwave Oven Use

Fill a 1-cup glass measure with water and place it in the microwave oven along with the container to be tested; heat one minute on HIGH. If the container is microwave oven safe, it should remain comfortably cool and the water should be hot. If the container becomes very hot, it has absorbed some microwave energy and should not be used. This test cannot be used for plastic containers.

Glass, Ceramic and China

Heat-Resistant glass cookware is invaluable in microwave cooking. Many of these items are readily available in most homes: glass jugs, mixing bowls, loaf dishes, covered casseroles, oblong baking dishes, pie plates and round or square cake dishes. Examples of this type of cookware are Pyrex® and Corningware®.

Dinnerware can be used for microwave heating. Many brands of dinnerware are microwave safe. Check the care information for reference to microwave use for dinnerware and serving pieces. If dinnerware is marked ovenproof, it frequently is safe to use in the microwave oven. However, to be sure, check by conducting microwave dish test.

Several types of glassware and dinnerware are not recommended for use in the Microwave Oven. Do not use dishes with metallic trim or containers with metal parts. Do not use cups or mugs with glued on handles, as they may fall off with continued heating.

Do not use delicate glassware.

Although the glassware may be transparent to microwave energy the heat from the food may cause the glassware to crack.

Paper Products and Freezer Wrap

Waxed paper, paper plates, cups and napkins should not be used for heating or cooking food. Freezer wrap should not be used as it is not heat resistant and may melt. Paper towel, greaseproof paper and bake paper may be safely used for short periods of time for covering or lining.

Plastics

Plastic dishes, cups and some freezer containers should be used with extreme care in the microwave oven. Choose plastic containers carefully as some will become soft, distorted or pitted from the heat of the food. Check manufacturer's recommendations concerning microwave safety. Plastic dishes should not be used for cooking over an extended period of time or with foods having high fat or sugar content. Most dishwasher-proof plastics are suitable for microwave oven cooking.

Cooking Bags designed to withstand boiling, freezing, or conventional heating are microwave safe. Prepare bags according to manufacturer's directions. When cooking by microwave, **DO NOT** use wire twist-ties to close bag. They can act as an antenna and cause arcing (sparks). **DO NOT COOK IN PLASTIC FOOD STORAGE BAGS.**

Plastic Wrap such as GLAD WRAP™ can be used to cover dishes in most recipes. Over an extended heating time, some disfiguration of the wrap may occur. When removing plastic wrap "covers", as well as any glass lid be careful to remove it away from you to avoid steam burns.

Metal

Metal cookware or utensils, and those with metallic trim, should **NOT** be used on microwave. Since microwave energy is reflected by metal, foods in metal containers will not cook evenly. There is also the possibility of "arcing".

Although metal utensils must be avoided in microwave cooking, some metal can be helpful when used correctly.

Aluminium foil can be used safely, if certain guidelines are followed, to prevent overcooking. Small pieces of foil are used to cover areas such as chicken wings, tips of roasts, or other thin parts that cook before the rest of the recipe is finished. Make sure foil is attached securely and doesn't touch sides of oven otherwise arcing may occur.

Foil lined containers, either cardboard or plastic, should **NOT** be used on the microwave oven as arcing could occur.

INTRODUCTION

Metal twist-ties, either paper or plastic coated, should NOT be used.

Frozen dinner trays can be used on microwave if the container is no deeper than 2 cm and is filled with food.

Metal Skewers can not be used in the microwave as arcing may occur. Wooden skewers are readily available and give the same result.

Shells: Scalloped baking shells are best used during reheating and for short periods of cooking time only.

Thermometers are available for use in microwave ovens. DO NOT USE CONVENTIONAL MERCURY TYPE CANDY OR MEAT THERMOMETERS in food while cooking in the microwave oven.

Browning Dishes

Browning dishes are used to sear chops, meat patties, steaks etc. A special coating on the bottom of the dish absorbs the microwave energy and becomes very hot. When foods are added to the dish, the result is a seared effect. Preheat the dish according to the manufacturer's directions. Add food to be seared and heat according to recipe or personal preference.

Use pot holders to remove the dish from Microwave Oven. Do not use the Browning Dish on or in a conventional stove.

Remember:

Food can be covered with a loose sheet of absorbent towel to prevent splattering.

Do not attempt to deep fry in the browning dish or microwave oven as you cannot control the temperature of the oil.

The surface of a browning dish can be scratched easily. Clean it gently with a liquid cleanser or soak overnight with a teaspoon of bicarbonate of soda.

Do not use your browning dishes on or in a conventional stove.

Jars and Bottles

Jars and Bottles can be used to warm food to serving temperature, if the lid is removed first. Cooking should not be done in these containers since most are not heat resistant and during extended heating times, heat from food would cause cracking or breaking.

Straw, Wicker, and Wood

Straw and wicker baskets may be used in the microwave oven for short periods of time to warm rolls or bread. Large wooden utensils, such as bowls or cutting boards should NOT be used for prolonged heating as the microwave energy may cause the wood to become dry and brittle.

Microwave Recipe Preparation and Techniques

Microwaves penetrate the surface of the food to a depth of about two to three centimetres and then the heat is gradually conducted in a random pattern. Some parts of food matter cook faster than others. Special microwaving techniques are used to promote fast and even cooking. Some of these techniques are similar to those used in conventional cooking, but because microwaves produce heat very quickly they are extremely important. It's a must to be familiar with the following tips.

Food Characteristics

Size and Quantity

Small portions cook faster than large portions. As you increase the quantity of food you put into the microwave oven, you must also increase your cooking time. The microwave oven has only the same power regardless of quantity; thus the power is divided between more items and so it takes longer to cook.

As a general guide, if you double the quantity of food suggested in the recipe, add half the time suggested again.

Liquid Content

Low moisture foods take a shorter time to cook than foods with a lot of moisture.

Shape

Uniform sizes cook more evenly. To compensate for irregular shapes, place thin pieces towards the centre of the dish and thicker pieces towards the outer edge of the dish.

Bone and Fat

Bones conduct heat and cause the meat next to them to be heated more quickly. Large amounts of fat absorb microwave energy and meat next to these areas may overcook.

Starting Temperature

Food which has been sitting at room temperature takes less time to cook than refrigerated or frozen foods.

Density and Composition

Porous airy foods (cakes and breads) take less time to cook than heavy compact foods (meat and vegetables). Recipes high in fat and sugar content cook more quickly.

Techniques for Preparation

Timing

A range of cooking times is given in each recipe for two reasons. Firstly, to allow for the uncontrollable differences in food shapes, starting temperatures and personal preferences. Secondly, these allow for the differences in electrical voltage input which changes during peak load periods. Always remember that it is easier to add time to undercooked food. Once the food is overcooked, nothing can be done. For each recipe, an approximate cooking time is given.

Stirring

Stirring is often necessary during microwave cooking. We have noted when stirring is helpful in the recipes. Always bring the outside edges towards the centre and the centre portions to the outside.

Rearranging or Turning

Some foods should be turned in the container during cooking. For example, because of the different thicknesses in the breast and back sections of poultry, it is a good idea to turn poultry over once to ensure more even cooking. Rearranging or turning over uneven shaped food in the dish should be done as suggested to ensure a satisfactory result. Rearrange small items such as chicken pieces, prawns, hamburger patties, steak or chops. Rearrange pieces from the centre to the edge of the dish.

Cooking in Layers

Cooking in layers is not always successful as it takes twice as long to cook as a single layer and cooking may be uneven. You can successfully reheat two dinner plates of food at one time but remember to increase the reheating time and use a microwave warming rack.

Piercing of Foods

Pierce the skin or membrane of foods when cooked whole in the microwave oven. This allows steam to escape. If the skin has not been pierced, food may burst.

Cured Meats

Cured meats may overcook in some areas due to the high concentration of salts used in the curing process. So take care when cooking different brands of bacon as cooking times may vary slightly.

Covering

Covering food minimises the microwave cooking time.

Because microwave cooking is done with time and not direct heat, the rate of evaporation cannot be easily controlled. However, this can be corrected by using different materials to cover dishes. Plastic wrap is the best substitute for a lid as it creates a tighter seal and so retains more heat and steam. Wax paper and paper towel hold the heat in, but not the steam. These materials also prevent splattering. Use paper towel, wax paper or no cover, when steam is not needed for tenderising.

Browning

Meats and poultry, cooked longer than 10 to 15 minutes, brown from their own fat. Foods cooked for shorter periods of time can be aided with the help of a browning sauce, worcestershire sauce, or soy sauce. Simply brush one of these sauces over meat or poultry before cooking. Baked goods do not need long cooking time and therefore, do not brown. When cakes or cupcakes will be iced, no one will notice this visual difference. For cakes or cupcakes, brown sugar can be used in the recipe in place of caster sugar or the surface can be sprinkled with dark spices before baking.

Standing Time

The moisture molecules continue to vibrate in the food when the microwave oven has turned itself off. After all, the molecules had been vibrating at 2,450,000,000 times per second during cooking. So cooking continues even after the food is no longer being exposed to the microwaves in or outside your microwave oven.

Standing time refers to the time it takes (after the microwave time is completed) to allow the interior of the food to finish cooking.

The amount of standing time varies with the size and density of the food. In meat cookery the internal temperature will rise between 5°C and 10°C if allowed to stand covered for ten to fifteen minutes. Casseroles and vegetables need a shorter amount of standing time, but this time is necessary to allow foods to complete cooking in the centre without overcooking on the edges.

The power level used in microwave cooking also determines the standing time. For example, when using a lower power level the standing time is shorter because of a lower concentration of heat in the food. Foods should always be kept covered while standing in order to retain the heat. If a longer standing time is required (while you cook another food to serve with the first, for instance), cover with aluminium foil.

Defrosting

Not only does a microwave allow you to defrost in a fraction of the time that it would take at room temperature, but because of this speed, the likelihood of bacteria building up is minimised.

Preparation for Freezing

The finished quality of the prepared food will depend on the original quality before freezing, the care the food receives during freezing, and the techniques and times used for defrosting. Select good quality fresh meat, poultry, or fish for freezing. Foods should be frozen as soon as possible after purchasing to preserve their quality. Wrapping materials and freezing temperature affect defrosting results.

WRAPPING MATERIALS best suited for use in the freezer are odourless and moisture and vapour proof. Meats need to be removed from their wrappings before defrosting. Therefore, containers such as glass freezer jars and plastic freezer containers are unsuitable. Heavy-duty plastic wraps and bags, and freezer wrap are suitable. If aluminium foil is used for wrapping, all pieces of foil should be removed before defrosting in your microwave oven. Meats may also be frozen in their store packaging for short periods of time.

When **WRAPPING FOR FREEZING**, arrange meat in thin uniform layers. Meat pieces and minced meat will defrost more evenly if frozen in 1 to 2 piece layers. To aid in separating chops and hamburger patties during defrosting, place a piece of wax paper between the layers. **REMOVE GIBLETS** from fresh whole poultry. (The giblets may be frozen separately, if desired.) Clean and dry poultry. Tie legs and wings with string; this helps poultry keep its shape during freezing. If poultry is packaged frozen, it may be defrosted even though the giblets are inside the cavity. However, the cavity will be very icy after the defrosting cycle. It will be necessary to run cold water inside the poultry.

FISH AND SHELLFISH are best frozen in single layers. Fillets may be frozen 2 or 3 deep, but place a piece of wax paper or plastic wrap between each layer. Prawns or scallops may be quick frozen on a biscuit tray covered with plastic wrap. Once they are frozen, simply place in a freezer bag or container. If they are thoroughly frozen before placing in the bag, they will not stick to each other.

REMOVE ALL AIR before sealing plastic bags. Centre food to be wrapped on material. Bring two edges, up over the centre and start folding down in 3 cm tucks until wrap is close to meat. Remove excess air from package. Shape ends into triangles and fold up over centre. Tape securely.

LABEL package with type and cut of meat, date and weight.

FREEZE FOODS in a freezer which is maintained at -18°C or lower. Defrosting times given in the charts are for thoroughly frozen foods (i.e. at least 24 hours in freezer).

Auto Defrost

Before freezing, package foods according to directions given in "Preparation for Freezing". Auto weight defrost is designed to automatically defrost popular cuts of meat and poultry as well as fish.

Before Starting

CONVERT grams to tenth of a kilogram. Meats packaged in most supermarkets are labelled with the weight in kilograms and tenths of a kilogram.

Remove food from wrapper and set on a roasting rack in a dish. Put in the weight of the item to be defrosted using the weight pads of Auto Defrost.

During defrosting two beeps will occur one third and two thirds through defrosting time.

At the first beep

TURN OVER all meat, poultry, fish and shellfish.

REMOVE defrosted meat from minced meat, stewing meat, poultry pieces or prawns etc.

SHIELD thin ends of roasts or poultry legs and wings with foil.

At the second beep

TURN OVER roasts or whole poultry. **BREAK APART** stewing meat, chicken pieces and minced meat. **SEPARATE** chops and hamburger patties. **REMOVE** defrosted minced meat, stewing meat or poultry pieces.

SHIELD ends of roasts, fat or bones with foil.

After Defrosting

LARGE ROASTS may still be icy in centre. Allow to stand 15 to 30 minutes in refrigerator to completely defrost.

Time Defrost

Before freezing, package foods according to directions given in "Preparation for freezing".

Remove food from wrapper and set on a roasting rack in a dish. Press the power pad to select defrost and defrost for the time recommended in the chart.

INTRODUCTION

Reheat – Frozen Convenience Foods

Pre-cooked Frozen Convenience Foods may be re-heated by manual microwave or by using the Frozen Reheat pad (NN-7852/6852). Refer to page

30 for use of the Frozen Reheat programme. Items which may be re-heated manually are listed below.

ITEM FROZEN (Pre-cooked)	POWER	TIME (In minutes)	SPECIAL INSTRUCTIONS
Plate Food	DEFROST then MEDIUM-HIGH	3 to 4 then 3 to 4	Arrange food evenly on a dinner plate. Add butter or gravy where desired. Cover plate with plastic wrap.
Family TV style dinner (320 g)	MEDIUM	8 to 10	Remove foil cover and replace with plastic wrap.
Bread 1 slice	MEDIUM	10 to 15 sec	Do not let bread get hot, or it will become rubbery and dry out. Remove whole loaf from original wrapper.
1 loaf	MEDIUM	2 to 4	
6 rolls	MEDIUM	2 to 3	
Scones – 6 (400 g)	MEDIUM	2 to 3	Place on paper towel to absorb moisture.
Cheesecake (600 g)	DEFROST	6 to 8	Defrost on paper lined plate. Stand 2 minutes.
Instant Casserole in Pouch (serves 2)	MEDIUM	4 to 6	Remove from container. Defrost on plate.
Vegetables & Sauce (in the bag) (500 g)	MEDIUM	8 to 10	Pierce pouch.
Fish in Sauce (200 g)	MEDIUM	5 to 6	Pierce corner of bag. Heat on plate.
Fruit Pie (500 g)	DEFROST then MEDIUM-HIGH	6 to 8 6 to 8	Pierce corner of bag. Heat on a plate.
Pizza (350 g)	HIGH	5 to 7	Remove from foil container and place uncovered into a pie dish.
Meat Pie (300 g)	DEFROST then MEDIUM	4 to 6 2 to 3	Remove from package and place onto paper towel or follow manufacturers instructions.
Chicken Pieces (500 g)	DEFROST then MEDIUM-HIGH	5 to 7 6 to 8	Place onto paper towel lined plate.
Sausage Rolls (250 g)	MEDIUM	3 to 5	Place onto paper towel lined plate.
Fish fingers – 8(200 g)	DEFROST then HIGH	3 to 5 2 to 3	Place onto paper towel lined plate.
Lasagne (300 g)	MEDIUM	10 to 12	Remove from foil container, place into serving dish.
Croissants – 4 (250 g)	MEDIUM	2 to 3	Place onto paper towel lined plate.
Muffins – 4 (350 g)	HIGH	1 to 2	Place onto paper towel lined plate.

One Touch Cooking

Important Hints for One Touch Sensor Cooking

1. It is important that when preparing your food for One Touch Sensor Cooking/Reheating that the food be placed in an appropriate sized dish and covered securely with plastic wrap or a well fitted lid. If the lid does not fit securely, the sensor will calculate an incorrect cooking time.
2. The Automatic One Touch Sensor Cooking feature works by detecting the amount of steam generated by the food being cooked. From the amount of steam generated in the initial cooking stage, the oven then calculates the remaining cooking time based on a pre-determined programme.
It is important that the food be covered securely during the first stage of cooking to ensure the steam calculation is correct.
3. Foods weighing less than 125 grams should be cooked using manual micro power and entering your own cooking time.
4. Before using the One Touch Sensor Cook/Reheat ensure that the turntable is dry otherwise incorrect results may occur.
5. During the first stage of cooking the sensor category number will be displayed in the display window. Do not open the microwave oven door during this stage of cooking, otherwise steam will escape therefore giving an incorrect reading.
6. Once the steam level has been detected the oven will beep twice and the remaining cooking time will then appear in the display window and count down. At this time the oven door may be opened to stir, turn or add foods.
7. When the remaining cooking time is greater than 60 minutes the time will appear in the display window in hours and minutes.
8. Standing time may be programmed after the Sensor Cook programme as a two stage cooking sequence. Select the cooking cycle you require then use the TIMER pad and enter the standing time.
9. The desired cooking control (more/Less) may be used to increase or decrease the cooking time.

Sensor Reheat

Min Weight 125 g
Max Weight 1.0 kg

All foods must be pre-cooked. Casseroles, Plated dinners, soups, stews, pasta dishes (except lasagne), canned foods.

Reheat lasagne, non-stirrable foods, pastries, pies etc. using manual MICRO POWER.

Foods should be reheated from refrigerator or room temperature, do not reheat frozen foods on this

setting. Where possible place foods onto dinner plates or flat type dishes. Do not reheat in foil or plastic containers as unsuccessful reheating times will result. All foods should be covered securely with plastic wrap or a well fitting lid. where possible after heating, stir foods and stand covered for 2 to 3 minutes before serving.

To achieve the best cooking results use the most appropriate food setting listed in the following chart.

Sensor Cook Category

Food Category (Min Weight - Max Weight)	Cooking Hints
VEGETABLES (125g-1.0kg) Suitable for all types of leaf, green and soft varieties of vegetables including broccoli, squash, cauliflower, cabbage, asparagus, beans, celery, zucchini, spinach, capsicum or a mixture of these.	All vegetables should be trimmed or prepared and cut into evenly sized pieces. Add 1 tablespoon to 1/4 cup of water to vegetables if dehydrated or a softer cooked texture is desired. Place into an appropriately sized dish, and cover securely with plastic wrap or a well fitting lid. Do not use plastic dishes as a desired seal cannot be achieved. If desired, butter, herbs etc. may be added but do not add salt until after cooking. If possible, stir vegetables after cooking time is displayed.
ROOT VEGETABLES (125g-1.0kg) Suitable for all types of hard vegetables including potatoes, sweet potatoes, pumpkin, swedes, turnips, parsnips, beetroot, carrots and onions or a mixture of these vegetables.

Using a larger sized dish will prevent rice from boiling over. We recommend the following proportions of rice to water: 1/2 cup of rice with 1 cup of water, 1 cup of rice with 1 1/2 cups of water and 2 cups of rice with 3 cups of water. Always use cold tap water when cooking rice by automatic sensor. Do not cook rice in plastic containers as unsuccessful cooking times may result. Dish should be covered securely with plastic wrap or a well fitting lid. When the cooking time appears in the display screen, remove plastic wrap or lid. At the completion of the cooking time allow the rice to stand for 5 to 10 minutes.</p>
<p>FISH (125g-1.0kg)</p> <p>Suitable for cooking whole fish and fish fillets.</p> <p>Better results will be achieved if prawns, scallops etc. are cooked using manual MICRO POWER.</p>	<p>Select fish suitable for microwave cooking and place in a single layer in a shallow dish, with the skin side down. Butter, herbs, or spices may be added to add flavour. Overlap thin ends of fillets to prevent overcooking. Whole fish may be filled with seasoning and the cavity held closed with wooden skewers. Shield the eye and tail area of whole fish with small amounts of aluminum foil to prevent overcooking. Cover dish securely with plastic wrap or a well fitting lid. Allow large amounts of fish to stand for 3 to 5 minutes after cooking before serving.</p>

Food Category (Min Weight - Max Weight)	Cooking Hints
BEEF (1.0kg-2.5kg) (NN-7852/6852 only) Suitable for cooking rump, topside, sirloin or tenderloin roasts.	Select roasts that are uniform in shape for best results. If roast is uneven, tie with string or shield thin portions once countdown appears. Less tender cuts of meat, eg. chuck should not be cooked using the Automatic Sensor, use a lower manual micro power setting to tenderise. See page 48 for details.
LAMB (1.0kg-2.5kg) (NN-7852/6852 only) Suitable for cooking leg, shoulder, loin or rack of lamb roasts.	Whole roasting pieces should be totally thawed before cooking. Meats may be marinated, seasoned or stuffed before cooking. Do not sprinkle roasts with flour as it will not dry and crisp like in a conventional oven. Place roasts fat side down on a microwave rack set into a dish. Cover securely with plastic wrap.
PORK (1.0kg-2.5kg) (NN-7852/6852 only) Foreloin, Middle loin or leg pieces are suitable for roasting.	Once countdown time appears in the display window, remove the plastic wrap and turn, re-arrange or shield roast if required. Always allow 10 to 15 minutes standing time after cooking. This makes carving easier and ensures that the heating is even throughout.
CHICKEN (500g-2.0kg) Suitable for cooking whole chickens and chicken pieces.	Whole chickens should be cooked directly from the refrigerator and totally thawed. Tie legs together with string. Place onto a microwave rack set inside a dish. Place whole poultry breast side down. Cover completely with plastic wrap. Do not stuff poultry with raw meat. Bread crumb or cooked rice seasonings may be used. If required, shield the chicken breast, wings or drumsticks with small pieces of foil to prevent from drying out. Arrange chicken pieces skin side up with thicker, meatier portions towards the edge of the dish. Once countdown time appears in the display window, remove plastic wrap and re-arrange or turn chicken. Always allow at least 5 to 10 minutes for pieces and 10 to 15 minutes for whole chicken, standing time at the completion of cooking. This makes carving the meat easier and ensures that the heat is even throughout.
CASSEROLE (500g-2.0kg) Suitable for cooking casseroles with less tender cuts of meat combined with liquid and vegetables.	Cut meat and vegetables into even size pieces. Place in a suitable sized dish. Dish should be approximately 3/4 full. Do not use plastic dishes as incorrect cooking time may result. Add 1/2 to 1 cup of soup, broth or stock per 500 g of meat. Cover securely with plastic wrap or a well fitting lid.
STEWED FRUIT (250g-2.0kg) (NN-7852/6852 only) Suitable for cooking fruits including rhubarb, strawberries, raspberries, blueberries, nectarines, pears, plums, apples and apricots. Minimum and maximum weights include sugar and water added to fruits.	Trim and prepare fruit into uniform size pieces. Add approximately 1/4 cup of caster sugar and 1/2 cup of water per 250 g of fruit. If not adding sugar slightly decrease the water content. The greater the amount of water used, the softer the fruit will be. Do not use plastic dishes to cook stewed fruit as incorrect cooking time may result. Place fruit, sugar and water into an appropriate sized dish. Cover securely with plastic wrap or a well fitting lid.

Converting Your Favourite Conventional Recipes for Microwave Cooking

When adapting conventional recipes for microwave cooking, reduce the conventional cooking time by one quarter or a third.

e.g. A chicken which takes 1 hour to cook in a moderate oven will take 15 to 20 minutes on a medium power in your microwave oven.

Use similar microwave recipes to help you adapt conventional recipes. Remember it is always best to undercook a recipe and then add an extra minute or two to finish it off.

Here are some other tips that may help:

- * Reduce liquids in a conventional recipe by one half to two thirds. e.g. 1 cup (250 ml) should be reduced to 1/2 cup (125 ml).
 - * Add more thickening such as flour or cornflour to sauces and gravies if you do not reduce the liquid.
 - * Reduce seasonings slightly in a recipe where ingredients do not have time to simmer by microwave.
 - * Do not salt meats, poultry or vegetables before cooking otherwise they will toughen and dry out.
 - * If one ingredient takes longer to cook than the others, precook it in the microwave oven first. Onion, celery and capsicum are examples.
 - * If meat or vegetables are not being browned before cooking, omit any oil or fat that would have been used for browning.
 - * Reduce leavening agents for cakes and biscuits by one quarter and increase liquids by one quarter.
 - * Biscuits require a stiff dough. Increase flour by about 20 percent. Substitute brown sugar for white sugar, and use biscuit recipes that have dark spices or require icing. Because of the short cooking time, biscuits don't have time to brown. Chill dough for half an hour before baking. This produces a crisper biscuit. Bake biscuits on a glass tray lined with greaseproof paper.
 - * Since microwaves penetrate foods about two centimetres from the top, bottom and sides, mixtures in round shapes and rings cook more evenly. Corners receive more energy and may overcook.
 - * Items with a lot of water, such as rice or pasta, cook in about the same time as they would on a conventional stove. (Refer to Rice and Pasta chapter.)
- Select recipes that convert easily to microwave cooking such as casseroles, stews, baked chicken, fish and vegetable dishes. The results from foods such as grilled meats, cooked soufflés or two-crust pies could be less than satisfactory. Never attempt to deep fry in your microwave oven.

Menu Planning for Microwave Cooking

How to Keep Everything Hot at The Same Time

Plan your meals so that the food will not all need last minute cooking or attention at the same time. The special features of microwave cookery make it easy to serve meals with everything piping hot. Cooking of some foods may be interrupted while you start others, without harming the nutritional value or flavour of either.

A recipe which requires standing time can be microwaved first and another food cooked while it stands. Dishes prepared in advance can be reheated briefly before serving.

It does take some experience and time to cook with confidence. Microwaves are fast so you will have to do some experimenting. You might find you will use your conventional range in conjunction with your microwave oven. For example, while cooking the roast in the microwave oven, you can be cooking the vegetables and gravy on the range top. This can also be done the other way around. Prepare your meal as follows.

1. Firstly, cook the most dense item (roast or casserole). Drain and retain meat juice from joints then cover with foil.
2. Cook the potatoes, rice or pasta.
3. Cover with foil for standing.
4. Cook greens and other vegetables.
5. Cover with foil for standing.
6. Cook the gravy with the retained meat juices, stock and thickening.
7. Carve the roast and serve the vegetables and gravy.

While you are learning to plan meals, you may get a bit behind time. Don't worry. Dinner servings may be suitably reheated on MEDIUM-HIGH, at 2 minutes per serving.

If you prefer not to use foil, cover food with saucepan lids. A metal lid will retain the heat for at least 15 minutes.

Meanwhile, how can you cook all the vegetables at the same time? Simply place potatoes and pumpkin in one dish and less dense vegetables such as broccoli, cabbage, cauliflower, beans and peas in another. Sprinkle greens with water. Cover with a lid or plastic wrap. Cook on HIGH for approximately 10 to 15 minutes for a serving for four people.

Remember, if you increase the quantity of vegetables, increase the cooking time.

Fresh and frozen vegetables can be mixed on a vegetable platter, but remember the latter are not as dense as fresh vegetables, as they have been blanched before freezing.

If vegetables are cut to a similar size to each other, they can be cooked in separate ramekins or small dishes at the same time.

Boiled Egg

Eggs cooked in their shells in a microwave oven can, and often do, explode due to the build up of internal pressure. However, by following the instructions given here, you can boil an egg successfully. Just take care to use foil as instructed below.

Serves: 1

Ingredients:

1 x 61 g egg (size 7)
1 cup hot water
aluminium foil

Method:

Wrap egg totally in aluminium foil. There should be no egg showing. Place egg in a 1-cup glass jug with 1/2 cup hot water. Cook on HIGH—For soft boiled—4 to 5 minutes—For hard boiled—5 to 6 minutes. Allow to stand in the cooking water 2 minutes for soft boiled and 5 minutes for hard boiled before serving.

Tip: While microwaving boiled eggs doesn't save you time, it does save you electricity and, best of all, washing up. All you have to do if you want more than one egg, is use a larger dish, more water (say, two cups) and cook a little longer (an extra 2 to 4 minutes).

Gravy

Makes: 2 cups

Ingredients:

2 tablespoons dripping or pan juices.
1 small onion, finely chopped
2 tablespoons flour
1 tablespoon tomato paste
1 1/2 cups beef stock
salt and pepper

Method:

Place dripping or pan juices and onion in a 2-cup jug. Cook on HIGH for 2 minutes. Add flour, tomato paste and half of the beef stock. Stir well and cook on HIGH for 2 minutes. Add remaining stock, stir well and cook on HIGH for a further 2 minutes. Season with salt and pepper. Serve with the meat of your choice.

Tea

Serves: 1

Ingredients:

3/4 cup hot tap water
1 teabag

Method:

Pour water into a heatproof cup. Cook on HIGH for 1 to 2 minutes. Submerge tea bag in water. Stand until desired strength is reached. Remove tea bag. Add milk and sugar if desired. Stir.

Coffee

Serves: 1

Ingredients:

3/4 cup water
1 to 2 teaspoons instant coffee

Method:

Pour water into a heatproof cup. Add coffee. Stir. Cook on HIGH for 1 to 2 minutes. Add milk and sugar if desired. Stir.

Poached Eggs

Serves: 2

Ingredients:

2 x 61 g eggs (size 7)
1/2 cup hot tap water
dash of vinegar
pinch of salt

Method:

Place one quarter of a cup of water, dash of vinegar and pinch of salt into 2 ramekin dishes or small glass bowls.

Cook water on HIGH for 1 1/2 minutes.

Break egg into boiling water and with a toothpick pierce egg yolk twice and egg white several times. Cover dish with plastic wrap and cook on MEDIUM for 30 to 40 seconds.

Stand covered for 1 minute before serving.

Note: The size of the egg will alter cooking time.

Muesli

Makes: 3 1/2 cups

Ingredients:

1/3 cup honey
1/4 cup oil
2 cups rolled oats
1/4 cup each of:
bran
wheat germ
coconut
nuts (chopped)
sunflower seeds
sesame seeds
1/2 cup mixed dried fruit of your choice

Method:

Warm honey and oil (approximately 30 seconds) on HIGH until honey is melted, stirring once. Place dry ingredients in a large container and stir in honey mixture. Cook on HIGH for 6 to 7 minutes, stirring several times. Stir in selected dry fruit. Leave to go cold, and store in an airtight container.

EVERYDAY BASICS

Basic White Sauce

Makes: 1 cup

Ingredients:

2 tablespoons butter
2 tablespoons flour
salt and white pepper
1 1/4 cups milk

Method:

Place butter in a 4-cup jug. Cook on HIGH for 30 to 40 seconds. Stir in flour, salt and pepper. Gradually add milk, stirring until smooth. Cook on HIGH for 3 to 4 minutes, stirring twice.

Tip: For cheese sauce, stir in 1/2 cup grated cheese once sauce has thickened.

Boiled Rice

Serves: 4

Ingredients:

1 cup long grain rice
1 1/2 cups hot tap water
1/2 teaspoon salt

Method:

Place all ingredients in a 3-litre dish. Cook uncovered on HIGH for 10 to 12 minutes. Stand covered for 10 minutes. Drain and serve.

Tip: Butter and parsley can be mixed through before serving.

Scrambled Eggs

Serves: 2

Ingredients:

4 x 61 g eggs
4 tablespoons milk
pinch salt

Method:

In a 1-litre casserole dish, beat eggs lightly with a whisk. Add milk and salt and whisk until well combined. Cover dish with plastic wrap and cook on MEDIUM for 1 1/2 to 2 minutes. Stir egg and cook for a further 1 1/2 to 2 minutes. Stand covered for 1 minute before serving.

Boiled Brown Rice

Serves: 3 to 4

Ingredients:

1 cup brown rice
4 cups boiling water
1/2 teaspoon salt

Method:

Place all ingredients in a 4-litre dish. Cook uncovered on HIGH for 22 to 25 minutes. Stand covered for 10 minutes. Drain and rinse under hot water.

Hot Cocoa

Makes: 1 cup

Ingredients:

2 teaspoons cocoa powder
1 teaspoon sugar
2 tablespoons water
3/4 cup milk

Method:

Combine cocoa, sugar and water in a heatproof cup. Cook on HIGH for 10 to 15 seconds. Stir in milk. Cook on MEDIUM-HIGH for 1 to 2 minutes.

Hot Lemon and Honey Drink

Makes: 1

Ingredients:

juice of 1/2 lemon
1 tablespoon honey
3/4 cup water

Method:

Mix all ingredients in a 2 cup heatproof jug. Cook on HIGH for 2 to 3 minutes. Stir well.

Fried Eggs

A good recipe for the browning dish.

Serves: 1 to 4

Ingredients:

1 to 4 eggs 61 g each
1 to 2 tablespoons butter

Method:

Preheat a browning dish on HIGH for 3 to 5 minutes. Add butter. Break eggs into browning dish. Cook on HIGH power for:

1 egg—15 to 20 seconds
2 eggs—20 to 30 seconds
4 eggs—30 to 40 seconds

Allow to stand for 1 minute before serving.

Pasta

Serves: 1 to 2

Ingredients:

125 g dried pasta
4 cups hot tap water

Method:

Place pasta and water in a 2 to 3 litre casserole dish. Place uncovered in microwave and cook on HIGH for 6 to 8 minutes. Allow to stand for 3 to 5 minutes before draining.

Macaroni and Cheese

Serves: 4 to 6

Ingredients:

40 g butter
2 onions, finely chopped
2 tablespoons flour
2 cups milk
1 cup grated tasty cheese
6 cups cooked macaroni, drained well
1/2 cup extra grated tasty cheese
paprika

Method:

Place butter and onions in a 2-litre casserole dish and cook on HIGH for 3 to 5 minutes. Add flour, mix well and cook on HIGH for 1 minute. Blend in milk and cook on HIGH for 4 to 5 minutes, stirring halfway through cooking. Add cheese to sauce. Place macaroni and sauce in a 3-litre casserole dish. Mix well. Top with extra cheese and sprinkle with paprika. Cook on HIGH for 6 to 8 minutes.

Packet Cake

Ingredients:

1 packet cake mix (340 g)
Ingredients as recommended by manufacturer

Method:

Mix cake and other ingredients with a metal spoon. DO NOT OVERBEAT. Pour into 20 cm round dish that has been lightly greased and lined. Cook on MEDIUM for 6 to 8 minutes. Stand and allow to cool before removing.

Variations:

1 tablespoon jam added to batter before cooking.

Add 1 cup sour cream to batter and halve water suggested by manufacturer.

Half a cup chopped nuts, 1/4 cup brown sugar and 1 teaspoon cinnamon. Mix and place on base of cake dish before cooking cake.

Two tablespoons honey and 30 g butter melted in glass jug on HIGH 30 to 60 seconds. Pour over just baked buttercake. Sprinkle with cinnamon. Serve warm with cream or custard as a dessert or cold with cream as a tea cake.

A quarter of a cup toasted muesli mixed with 1 tablespoon marmalade and placed in the base of the dish.

Tip: Packet cakes are best mixed by hand as the microwaves will do the aerating.

Baked Custard

Serves: 4 to 5

Ingredients:

425 ml milk
3 eggs, lightly beaten
1/4 cup sugar
1 teaspoon vanilla essence
pinch ground nutmeg

Method:

Place milk in a 4-cup glass jug. Cook on HIGH for 2 minutes. Add eggs, sugar and vanilla to milk, whisking all the time. Strain mixture into a 20 cm round dish, sprinkle with nutmeg. Cook on MEDIUM-LOW for 14 to 16 minutes. Allow to stand covered for 5 minutes before serving.

Roasted Nuts

Serves: 2 to 4

Morish with drinks

Ingredients:

1 cup raw peanuts
(with or without skins, and unsalted)
2 teaspoons salad oil
salt to taste

Method:

Place peanuts in a single layer on a pie plate. Cook on HIGH for 3 to 5 minutes, stirring every 2 minutes during cooking until golden brown. Drizzle nuts with oil and sprinkle with salt. Stir well. Cook on HIGH for 30 to 40 seconds. Stir. Serve hot or cold in a small bowl.

Vegetable Soup

Serves: 4 to 6

Ingredients:

500 g prepared vegetables of your choice (carrots, turnips, celery, etc.) finely chopped
1 onion, chopped
2 tablespoons butter
2 tablespoons plain flour
3 1/2 cups chicken stock
salt and pepper
3 tablespoons parsley, chopped

Method:

Place vegetables, except onion, in a 3-litre casserole dish. Cover and cook on HIGH for 8 to 10 minutes. Set aside. Place onion and butter in a 4-cup jug and cook on HIGH for 2 to 3 minutes. Add flour to onion mixture and mix well. Gradually add 1 cup of stock. Stir well. Cook on HIGH for 3 minutes, stirring halfway through cooking. Add remaining stock and onion mixture to vegetables in casserole dish. Cook on HIGH for 12 to 14 minutes. Season with salt and pepper and serve, sprinkled with chopped parsley.

SOUPS, SNACKS AND STARTERS

Pumpkin Soup

Pea and Ham Soup

Serves: 6 to 8

Ingredients:

500 g split peas
2 cups water
500 g ham or bacon bones
1 bayleaf
3 cup water, extra
2 rashers bacon, rind removed
1 medium sized carrot, peeled and diced
1 large onion, peeled and diced
1/2 teaspoon thyme
6 cups chicken or bacon stock

Method:

Soak peas in 2 cups of water for at least 1 hour. Drain.

Place peas and 3 cups fresh water in a 4-litre casserole dish with bones and bayleaf. Cook covered on HIGH for 10 minutes. Reduce power to MEDIUM and cook for a further 20 to 25 minutes. Remove meat from bones and set aside. Discard bayleaf. Place bacon between 2 sheets of paper towel on a dinner plate and cook on HIGH for 2 to 3 minutes. Crumble bacon with your fingers. Place meat from bones, carrot and onion in a small dish and cook on HIGH for 2 minutes. Add vegetables, bacon, thyme and stock to split peas. Cook on HIGH for 10 minutes. Reduce power to MEDIUM and cook for a further 15 minutes. Serve hot in individual bowls.

FISH AND SHELLFISH

Directions for Cooking Fish and Shellfish by Microwave

Clean fish before starting the recipe. Arrange fish in a single layer, do not overlap edges. Prawns and scallops should be placed in a single layer.

Cover dish with plastic wrap. Cook on the power level and for the minimum time recommended in the chart below. Halfway through cooking rearrange or stir prawns or scallops.

Fish and Shellfish Chart for Microwave Cooking by Time

FISH OR SHELLFISH	AMOUNT	POWER	APPROX. COOKING TIME (in minutes)
Fish Fillets	500 g	MEDIUM	4 to 6

Method:

Place butter and garlic in a 20 cm round dish and cook on HIGH for 1 minute. Add lemon juice, parsley, salt and prawns. Cover and cook on MEDIUM for 2 to 3 minutes, stirring halfway through cooking. Stand covered for 5 minutes. Serve in individual ramekins.

Directions for Cooking Whole Poultry by Microwave

Season as desired, but salt after cooking. Browning sauce mixed with equal parts of butter will enhance the appearance.

Poultry may be stuffed or unstuffed. Tie legs together with cotton string. Place on microwave rack set in a rectangular dish. Place poultry breast-side down: turn over halfway through cooking. Cover with wax paper to prevent splattering.

If the poultry is not cooked enough return it to the oven and cook a few more minutes at the recommended power level.

DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN. Let stand, covered with foil, 10 to 15 minutes after cooking. Standing time allows the temperature to equalise throughout the food and finishes the cooking process.

If a large amount of juice accumulates in the bottom of the baking dish occasionally drain it. If desired, reserve for making gravy.

Less-tender birds should be cooked in liquid such as soup or broth. Use 1/4 cup per 500 g of poultry. Use an oven cooking bag or covered casserole. Select a covered casserole deep enough so that bird does not touch the lid.

If an oven cooking bag is used, prepare according to package directions. Do not use wire twist-ties to close bag. Use only nylon tie, a piece of cotton string, or a strip cut from the open end of the bag.

Make six 2 cm slits in top of bag.

Multiply the weight of the poultry by the minimum recommended minutes per 500 g. Programme Power and Time.

After cooking, check the internal temperature of the bird with a microwave or conventional meat thermometer, inserted into the thigh muscle. Check temperature in both muscles. The thermometer should not touch bone. If it does, the reading could be inaccurate. A thermometer cannot be accurately inserted into a small bird. To check desired cooking of a small bird, juices should be clear and the drumsticks should readily move up and down after standing time.

During cooking it may be necessary to shield legs, wings and the breast bone to prevent overcooking. Wooden toothpicks can be used to hold foil in place.

Directions for Cooking Poultry Pieces by Microwave

Cover with wax paper, or paper towel. Multiply the weight by the minimum time recommended in the chart.

Arrange pieces skin-side down, and evenly spread in a shallow dish.

Turn or rearrange halfway through cooking. Shield wing tips, drumstick ends etc. if required.

1.5 kg chicken
2 onions, sliced
1 large capsicum, sliced
1 can (425 g) peeled tomatoes
1/4 cup tomato paste
1 teaspoon oregano
salt and pepper

Method:

Place chicken breast- side down on a ceramic rack in a 3-litre dish. Cook on MEDIUM-HIGH for 35 to 40 minutes, stand for 10 minutes. Set aside. Place onions and capsicum into a 3-litre dish. Cook on HIGH for 3 to 4 minutes. Add tomatoes, tomato paste, oregano, salt and pepper. Mix well. Remove meat from chicken bones and cut into small pieces. Mix chicken through tomato mixture. Heat on MEDIUM-HIGH for 4 to 6 minutes.

Roast Chicken

Serves: 4 to 6

Ingredients:

1.5 kg chicken
2 tablespoons melted butter
seasoning of your choice-lemon, pepper, seasoned salt, etc.

Method:

Clean and pat dry chicken with paper towel. Brush chicken with melted butter and sprinkle with seasoning. Place chicken breast side down, on a rack in a 3-litre dish.
Cook on MEDIUM-HIGH for 30 to 35 minutes. Turn halfway through cooking.

Peanut Satay

Serves: 4

Ingredients:

Marinade:

1/2 teaspoon caraway seeds
1 teaspoon ground coriander
1 clove garlic, crushed
1 tablespoon brown sugar
1 tablespoon soy sauce
1 tablespoon lemon juice
pinch salt
750 g boneless chicken, cut into 2.5 cm cubes
bamboo skewers

Satay Sauce:

3 red chillies, seeded and finely chopped
2 cloves garlic, crushed
1 cm piece ginger, grated
1 teaspoon salt
1/2 cup peanut butter
1 cup water
1/4 cup sultanas
1/4 cup raisins
1/2 cup vinegar
1/2 cup sugar
1/2 cup peanuts
1/4 cup chutney (optional)

Method:

Combine all marinade ingredients in a bowl with chicken meat and marinate for at least 24 hours. Combine all sauce ingredients in a 6-cup jug and cook on HIGH for 8 to 10 minutes, stirring halfway through cooking. Purée sauce in a blender or food processor. Set aside. Preheat a browning dish on HIGH for 4 to 5 minutes. Thread chicken cubes onto bamboo skewers. MAIN FARE MEATS

Directions for Cooking Tender Cuts of Meat by Microwave

For best results, select roasts that are uniform in shape.

Place meat on a microwave rack in a suitable dish. Beef rib roast should be placed cut-side down. Other bone-in roasts should be placed fat-side down. Boneless roasts should be placed fat-side up.

Halfway through cooking turn roasts.

Half hams should be shielded by wrapping an 8 cm wide strip of foil around the large end of the ham.

Secure to the body of the ham with wooden toothpicks. Fold 3 cm over cut surface. For shank ham halves, shield shank bone by cupping it with foil.

One third of the way through cooking, remove ham from oven and cut off skin. Turn fat-side up and reshield edges. If desired, glaze last 10 to 20 minutes of cooking.

Loosely cover baking dish with wax paper or paper towel to prevent splatter. If a large amount of juice accumulates in the bottom of the dish, drain occasionally. If desired, reserve for making gravy. Multiply the weight of the roast by the minimum recommended times per 500 g. Programme Power and Time.

Meats can be shielded at the beginning of cooking or halfway through cooking. If you wish to shield at

the beginning of cooking, remove foil halfway through the cooking time. Beef and pork rib roasts should be shielded by the bones. Foil should extend about 5 cm down from bones. The shank, thin ends of boneless roasts should also be shielded. Make sure foil does not touch the sides of the oven, as arcing may occur.

Canned hams should be shielded on the top cut-edge with a 3 cm strip of foil. Wrap strip of foil around ham and secure to body of ham with wooden toothpicks. Fold 2 cm over cut surface.

After heating, check temperature using a meat thermometer. The thermometer should not touch bone or fat. If it does, the reading could be inaccurate. Lower temperatures are found in the centre of the roast and in the muscle close to a large bone, such as a pork loin centre rib roast. If the temperatures are low, return meat to the oven and cook a few more minutes at the recommended power level. **DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.** Let stand, covered with foil, 10 to 15 minutes. During standing time the internal temperature equalises and the temperature rises 5°C to 10°C.

Directions for Cooking Less-Tender Cuts of Meat by Microwave

Less-tender cuts of meat such as pot roasts should be cooked in liquid. Use 1/2 to 2 cup of soup, broth, etc per 500g of meat. Use an oven cooking bag or covered casserole when cooking less-tender cuts of meat. Select a covered casserole deep enough so that the meat does not touch the lid.

If an oven cooking bag is used, prepare the bag according to package directions. Do not use wire or

metal twist-ties. Use the nylon tie provided, otherwise, use a piece of cotton string or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag to allow steam to escape.

Multiply the weight of the roast by the minimum recommended minutes per 500 g. Programme Power and Time. Turn meat over halfway through cooking. Meat should be tender when cooked.

Serves: 4

Ingredients:

500 g lamb chops
1 onion, chopped
1 clove garlic, crushed
1 tablespoon butter or margarine
2 tablespoons tomato paste
1/2 teaspoon paprika
1 small capsicum, cut into 2.5 cm cubes
1 cup beef stock
2 tablespoon flour
2 tablespoon water
2 tablespoons sour cream

Method:

Trim fat and bones from meat and cut meat into 2 cm cubes. Place onion, garlic and butter or margarine in a 3-litre casserole dish. Cook on HIGH for 1 to 2 minutes. Add tomato paste and paprika and cook on HIGH for a further 2 minutes. Add lamb, capsicum and stock. Cover and cook on MEDIUM for 25 to 30 minutes stirring halfway through cooking. Mix flour with 2 tablespoon of water and stir into goulash mixture. Cook on HIGH for 1 to 2 minutes. Stir in sour cream and serve with pasta and rice.

Lamb & Mushroom Kebabs

Makes: 8 skewers

Ingredients:

1/4 cup red wine
2 teaspoons lemon juice
1 tablespoon oil
1 clove garlic, crushed
1/2 teaspoon ground coriander
freshly ground black pepper
500 g boneless leg lamb, trimmed and cut into 3 cm cubes
200 g mushrooms, stalks removed
1 tablespoon oil

Method:

Combine red wine, lemon juice, oil, garlic, coriander and pepper in a jug. Place lamb in a bowl. Pour over liquid. Cover and leave to marinate overnight. Preheat a browning dish on HIGH for 4 to 6 minutes. Thread lamb cubes and mushrooms alternately onto bamboo skewers. Approximately 4 cubes of meat per skewer. Add oil to browning dish and place 4 skewers in dish. Cook on HIGH for 2 to 3 minutes, turning once during cooking. Remove skewers and drain any juices. Preheat the browning dish on HIGH for a further 3 minutes. Add remaining 4 skewers and cook on HIGH for 2 to 3 minutes. Serve on a bed of rice.

Veal Paprika

Serves: 4

Ingredients:

750 g diced veal
250 g mushrooms, sliced
1 cup chicken stock
1 onion, finely chopped
1 teaspoon paprika
salt and pepper
2 tablespoons flour
1 tablespoon tomato paste
1/2 cup sour cream

Method:

In a 3-litre casserole dish combine veal, mushrooms, 1/2 cup of the chicken stock, onion, paprika and salt and pepper. Cook on MEDIUM-HIGH for 10 to 15 minutes. Blend flour with remaining stock. Stir into veal with tomato paste and cook on HIGH for 2 to 3 minutes. Blend in sour cream. Serve.

Barbecued Marinated Spare Ribs

Serves: 4

Ingredients:

1 kg pork spare ribs
3/4 cup fruit chutney
3/4 cup tomato sauce
1 tablespoon soy sauce
1 tablespoon Worcestershire sauce

Method:

Place all ingredients in a 3-litre casserole dish and marinate for several hours or overnight. Cook ribs on MEDIUM-HIGH power for 20 minutes turning once through cooking.

Veal and Pineapple Casserole

Serves: 4 to 6

Ingredients:

750 g veal steak, diced
2 tablespoons seasoned flour
125 g bacon, rind removed
2 onions, sliced
1 can (450 g) pineapple pieces, drained
2 tablespoons parsley, finely chopped
1/2 teaspoon dried basil
1 cup tomato purée

MAIN FARE MEATS

Roast Lamb

Roast Lamb

Serves: 4 to 6

Ingredients:

1/4 cup apricot jam
1.2 kg leg of lamb

Method:

Place lamb fat side down, on a rack in a 3-litre dish. Cook on MEDIUM for 30 to 35 minutes, turn halfway through cooking and brush with jam. Stand covered for 10 minutes before slicing. Serve with baked vegetables.

Lambs Fry and Bacon

Serves: 4

Ingredients:

750 g liver
1/4 cup flour
250 g bacon, rind removed and bacon cut into 2 cm strips
2 onions, sliced
1 tablespoon butter
ground black pepper
1 tablespoon chopped parsley

Method:

Soak liver in water for 30 minutes, remove skin and cut liver into thin strips. Coat liver with flour and shake off any excess. Place bacon and onion into 3-litre dish and cook on HIGH for 3 to 5 minutes. Remove and drain well on absorbent paper. Add half the butter to the dish and half the sliced liver. Cook on HIGH for 2 to 4 minutes, stir halfway through cooking. Repeat with remaining butter and liver. Return all the liver to the dish and add bacon and onion, season with pepper and add parsley. Stir well. Cook on HIGH 1 to 2 minutes and serve immediately.

Beef Lasagne

Serves: 8 to 10

Ingredients:

- 750 g lean beef mince
- 1 cup finely sliced mushrooms
- 1 onion, finely chopped
- 1 clove garlic, crushed
- 425 g tomatoes, roughly chopped
- 200 g tomato paste
- 1 teaspoon oregano
- 1 teaspoon basil
- salt and pepper
- 1/2 cup Parmesan cheese
- 500 g Ricotta cheese
- 250 g grated Mozzarella cheese
- 8 precooked lasagne noodles
- 1 cup extra grated Mozzarella cheese

Method:

Place meat, mushrooms, onion, and garlic in a 3-litre dish. Cook covered on MEDIUM-HIGH for 8 to 10 minutes. Drain off fat. Add tomatoes, tomato paste, oregano, basil, salt and pepper. Cook covered on MEDIUM-HIGH for 15 to 20 minutes, stirring halfway through cooking. Spoon quarter of the meat sauce into the base of a deep 26 cm x 20 cm dish. Mix all cheeses together, except for extra cheese. Top the meat with half the noodles and half of the mixed cheese. Spoon another quarter of the meat sauce over the cheese. Top with the remaining noodles and cheeses. Spread remaining meat sauce on cheese and sprinkle with extra cheese. Cook covered on MEDIUM-HIGH for 20 to 25 minutes.

Directions for Cooking Vegetables

Fresh Vegetables by Microwave

Place vegetables in a casserole dish. Add 2 to 3 tablespoons of water per 500 g of vegetables. Add salt to water or add after cooking. Do not place salt directly on vegetables. Cover dish with glass lid or plastic wrap.

Cook on HIGH according to time recommended in charts. Halfway through cooking, stir, turn vegetables over or rearrange.

Vegetables that are to be cooked whole and unpeeled, need to be pierced to allow steam to escape. Place vegetables on a paper towel lined dinner plate.

Allow to stand covered according to the time indicated in the charts.

Frozen Vegetables by Microwave

Remove vegetables from package and place in an appropriate sized container. Vegetables frozen in a pouch should be placed on a dish and the top

pierced. Cook on HIGH according to directions given in chart. Vegetables should be cooked covered with a lid or plastic wrap.

Halfway through cooking, stir, turn vegetables over or rearrange. Stir after cooking. Allow to stand for 2 to 3 minutes before serving.

Dried Beans or Peas by Microwave

Place hot tap water, in a 4-litre dish.

Bring hot water to the boil on HIGH for 10 to 12 minutes.

To Cook by Time: Add beans and 2 tablespoons oil to water. Cook according to directions in chart. Stir.

Note: Beans such as red kidney beans and lima beans should be soaked overnight before cooking.

250 g of dried beans equals about 3 cups cooked. Use in place of canned beans.

Allow to stand, covered, for 15 to 20 minutes.
